

## ULTEM 9085

### APPLICATIONS

ULTEM\* 9085 is a flame retardant high performance thermoplastic for direct digital manufacturing and rapid prototyping. It is ideal for the transportation industry due to its high strength-to-weight ratio and its FST (flame, smoke, and toxicity) rating. This unique material's preexisting certifications make it an excellent choice for the commercial transportation industry – especially aerospace, marine and ground vehicles. ULTEM 9085 allows design and manufacturing engineers to produce fully functional parts that are ideal for advanced functional prototypes or end use without the cost or lead time of traditional tooling.

1- Build orientation is on side long edge.  
2- Literature value unless otherwise noted.

3 - Due to amorphous nature, material does not display a melting point.  
4 - All Electrical Property values were generated from the average of test plaques built with default part density (solid).
